Henny Penny Gas Fryers earn ENERGY STAR® mark— customers save money and improve environment.

EATON, OH— Officials at Henny Penny Corporation were pleased to learn recently that the company's OFG and OGA 320-Series of gas open fryers earned the ENERGY STAR mark. Energy Star is a US Environmental Protection Agency designation awarded only to products that achieve the highest levels of energy efficiency. The 320-Series Gas open fryer line joins Henny Penny's 320-Series Electric open fryers and HHC-900 heated holding cabinets, which have already earned the ENERGY STAR mark.

The ENERGY STAR mark is widely recognized by consumers for identifying extremely energy-efficient products, such as residential lighting, appliances, heating/cooling systems, electronics and office equipment. The program was expanded to include the following commercial foodservice appliances: fryers, hot food holding cabinets, solid door refrigerators & freezers, and steam cookers.

Fryers that earn the ENERGY STAR must meet a minimum cooking efficiency of 50% (gas) and 80% (electric) while also meeting a maximum idle energy rate of 9,000 Btu/hr (gas) and 1,000 watts (electric). The bottom line? You can trust ENERGY STAR qualified products, like Henny Penny holding cabinets and fryers to meet strict EPA and Department of Energy guidelines for energy efficiency. You can also trust them to save you money year after year in operating costs.

For more information about ENERGY STAR or the fryers and heated holding cabinets that are ENERGY STAR approved, please open the following links:
